

Design Log
Digital poster

The software I have used to create my Digital poster is ___Microsoft powerpoint_____

Initial Design - This should include an image of your initial ideas

Feedback received: Its good, but it's still a bit bland and needs more interesting ideas.

Changes made: I used two borders in this slide, and my video rose from the base inside a curved rectangle shape. A heart with two hands in the centre has been placed on the top left side.

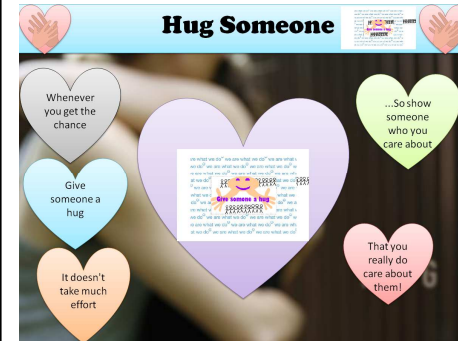

Draft Design - This should include your first attempt or draft logo

Feedback received: its better, but still lacking in oopmf. Needs something to attract attention.

Changes made: I have placed a hug background, and placed the video in a heart, I have put a permanent logo in the border as well. I have removed the border on the left as well

Final Design - This should include an image of your final design.

Feedback received: much better. Those hearts attract attention.

Changes made: I have made additional hearts, with messages inside, which float into the main screen after the logo.

Describe which software tools you have used and how they helped you to develop your product:
